

GREEN POLICY

The GHG Management team and employees will always be eager to integrate green thinking and green practices into all aspects of their daily operations. The focus will be on reducing the institutes carbon footprint and waste. They envision a workplace where every process has been “greened”.

The green and environment committee works on creating awareness on stop driving as much, recycle, compost, better office energy efficiency, “think green” all the time, make it a way of life, build a green image in the community, show measureable results.

We are committed to making a positive impact on the environment by becoming pros at developing and implementing effective green practices.

Focus on reducing carbon footprint by reducing energy use (electricity) and reducing vehicle emissions. Reduce waste in day to day office operations.

We are dedicated to taking the following actions to achieve our green vision:

- Plant more trees in and around the campus.
- Organize going green awareness programs.
- Reduce our Institutes carbon footprint.
- Reduce the amount of waste the Institutes produces.
- Increase our green knowledge.
